Roll No: 26

## Q) Input: n and d

Generate all decimal strings of length n which do not contain consecutive occurrences of digit d.

Use dynamic programming.

```
For example: if n = 3 and d = 2 then the output is 00, 01, 02, ..., 999 except 22x, x22, where x is any digit.
```

## Code:

```
#include <stdio.h>
#include <string.h>
#define MAX_N 100
#define NUM_DIGITS 10
long long dp[MAX_N][NUM_DIGITS][2];
// Function to generate and print valid strings
void generateStrings(int n, int d, int prev, int leadingZero, char* current) {
    // Base case: If the string length is 0, print the current string.
    if (n == 0) {
        printf("%s, ", current);
        return;
    // Iterate through all possible digits (0-9).
    for (int digit = 0; digit < NUM_DIGITS; digit++) {</pre>
        // Skip consecutive occurrences of digit 'd'.
        if (digit == d && prev == d) continue;
        // If the current digit is 0 and we are not allowed leading zeros,
        // skip it unless it's the first digit (leadingZero).
        if (digit == 0 && !leadingZero) {
            current[strlen(current) - 1] = '\0'; // Remove the last character
            generateStrings(n - 1, d, digit, 0, current);
        } else {
```

```
char newCurrent[MAX_N];
    sprintf(newCurrent, "%s%d", current, digit);
    generateStrings(n - 1, d, digit, 1, newCurrent);
    }
}

int main() {
    int n, d;
    printf("Enter the length of the strings (n): ");
    scanf("%d", &n);
    printf("Enter the digit to avoid consecutive occurrences (d): ");
    scanf("%d", &d);

    memset(dp, -1, sizeof(dp));

    char current[MAX_N] = "";
    generateStrings(n, d, -1, 0, current); // -1 for 'prev' means no previous digit.

    return 0;
}
```

## **Output:**

, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 711, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 789, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 81, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 867, 808, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 89, 89, 891, 892, 893, 894, 895, 896, 807, 808, 809, 801, 802, 803, 804, 805, 806, 807, 808, 809, 801, 802, 803, 804, 805, 806, 807, 808, 809, 801, 802, 803, 804, 805, 806, 807, 808, 809, 801, 802, 803, 804, 801, 802, 803, 804, 805, 806, 807, 808, 809, 801, 802, 803, 804, 802, 80
